

I-MOP INNOVATIVE FLOOR CLEANING MACHINE

NEW GENERATION OF FLOOR CLEANERS

In today's dynamic times, technology seems to be driving all areas of life. From communication to medicine to everyday tasks such as cleaning. Modern innovations are transforming our reality and changing the ways in which we perform even the simplest tasks.

The cleaning sector is no exception. With the evolution of technology, we are beginning to appreciate the potential that lies in modern cleaning tools. We are shifting to innovation, looking for ways to provide more efficient, eco-friendly and user-friendly solutions.

In this context comes the I-team, which offers us innovative solutions, such as modern I-MOP battery mops. These advanced devices not only make work easier, but also improve its quality. Thanks to the latest technologies, such as smart sensors and powerful batteries, the I-MOP mop becomes an irreplaceable tool in the fight against dirt and bacteria.

I-MOP offers:

- ▶ I-mop is the perfect solution to combat floor cleaning problems, combining the maneuverability of an ordinary mop with the power and efficiency of a professional automatic scrubber. It increases the cleaning speed by more than 80% compared to a traditional mop.
- ▶ Most machines can't handle access to tight, crowded areas. To the rescue comes the I-mop! It allows you to reach even the narrowest spaces, providing full mobility.
- ▶ With advanced suction technology, our system removes basically all water from the floor, eliminating the risk of slips and falls.
- ▶ It provides 90% cleaner surfaces compared to cleaning with a conventional mop.
- ▶ Thanks to the removable battery power, the device can be used constantly, even 24/7.
- ▶ You use the machine without the unnecessary restrictions of having to plug it into an outlet.
- ▶ It uses a small amount of chemical cleaning products.
- ▶ Depending on the type of floor surface, you can choose pads and brushes.
