

TOUCAN CHEMICAL FREE CLEANING

ALTERNATIVE SOLUTION WHICH GOES FURTHER IN GREEN CHEMISTRY

CLEANING AND DISINFECTING AGENT

Currently, ecological solutions and disinfection in the workplace, homes, public places are sought after - this is the goal of many organizations in the world.

The market is now flooded with a range of solutions, products and systems designed to neutralize unwanted fungi, bacteria and viruses.

Our company tested the TOUCAN system on several facilities we service (a simple disinfection and cleaning system).

DID YOU KNOW?

- ✓ 280 million tonnes per year of environmentally harmful chemicals are manufactured in the EU.
- ✓ About 300 million tonnes per year of plastics are produced globally and only 10% is recycled. 400 years is the time it takes for plastics to decompose.
- ✓ With Toucan, adopt a cleaning and disinfecting agent solution as an alternative to chemicals!

INTERESTING FACT

BENEFITS OF USING TOUCAN:

- This technology is affordable,
- The generated fluid is highly effective and approved by accredited laboratories,
- There is no transport costs because the liquid is produced at the customer,
- There are no costs of packaging disposal, as they are reusable,
- Liquid production costs are negligible, at the fractions of a penny,
- The liquid is produced on site, so it is always available,
- There is no need to store the liquid (saving storage space),
- A product that is completely ecological, does not pose any threat to the natural environment.
